## Important notes for analysis of numbers

The principal changes in the presentation of AXA's consolidated financial statements for the semester ended June 30, 2002 to the corresponding prior period are set out below:

- a) Income statement numbers are now shown gross of inter-segment eliminations. Previously, inter-segment eliminations were accounted for in the net investment results line.
- (b) In 2002, some consolidated subsidiaries, presenting contribution to the main financial indicators below the Group materiality threshold, have been consolidated under the equity method

### **Margin analysis for Life & Savings operations**

Since June 30, 2001, AXA has changed the basis for which it provides commentary on the operating results of the Life & Savings Segment to follow a "Margin Analysis" (please refer to the Margin Analysis Glossary at the end of the MD&A provided in this binder). Margin analysis is used by AXA management internally to evaluate performance and allocate resources within the Life & Savings Segment in line with AXA's strategic objectives. Margin analysis focuses on the underlying sources of profit and changes in that profit during the period.

The operating income under margin analysis is equal to that reported in AXA's Statement of Income, as the margin analysis is only a representation of the revenues recognized and expenses incurred during the period as determined under French GAAP. However, there are certain material differences between the detailed line-by-line presentation in the Statement of Income and the components of margin analysis as set out below.

- a) Gross premiums, fees, commissions and other revenues are allocated in the margin analysis based on the nature of the revenue between Fees and revenues and Net Technical margin.
- b) Policyholders' interest in participating insurance contracts is reflected as a change in insurance benefits in the Statement of Income. In the margin analysis, it is allocated to the related margin, i.e. the Investment Margin and the Net Technical Margin.
- c) The Investment Margin represents the net investment result in the Statement of Income and is adjusted to take into account the policyholders' participation (see (b) above) and to exclude the policyholder investment charges on unit-linked business, which are included in Fees and revenues.

Management is of the view that this is a better mechanism for discussing and analyzing operating performance in the period as it relates to the Life & Savings Segment.

The margin analysis presentation is detailed and commented in the MD&A. The accounting presentation has been kept in this appendix in order to provide consistency of financials' presentation with prior years.
