Press conference
Cautionary statements concerning forward-looking statements

Certain statements contained herein are forward-looking statements including, but not limited to, statements that are predictions of or indicate future events, trends, plans or objectives. Undue reliance should not be placed on such statements because, by their nature, they are subject to known and unknown risks and uncertainties. Please refer to AXA’s Annual Report on Form 20-F and AXA’s Document de Référence for the year ended December 31, 2007, for a description of certain important factors, risks and uncertainties that may affect AXA’s business.

In particular, please refer to the section "Special Note Regarding Forward-Looking Statements" in AXA's Annual Report on Form 20-F. AXA undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information, future events or circumstances or otherwise.
2008 financial statements are subject to completion of audit procedures by AXA’s independent auditors.

AXA's FY08 results have been prepared in accordance with IFRS and interpretations applicable and endorsed by the European Commission at December 31, 2008.

Adjusted earnings, underlying earnings, Life & Savings EEV, Group EV and NBV are non-GAAP measures and as such are not audited, may not be comparable to similarly titled measures reported by other companies and should be read together with our GAAP measures. Management uses these non-GAAP measures as key indicators of performance in assessing AXA’s various businesses and believes that the presentation of these measures provides useful and important information to shareholders and investors as measures of AXA's financial performance. For a reconciliation of underlying and adjusted earnings to net income see pages 25 and 26 of this presentation.

AXA Life & Savings EEV consists of the following elements: (i) Life & Savings Adjusted Net Asset Value (ANAV) which represents tangible net assets. It is derived by aggregating the local regulatory (statutory) balance sheets of the life companies and reconciled with the Life & Savings IFRS shareholders’ equity. (ii) Life & Savings Value of Inforce (VIF) which represents the discounted value of the local regulatory (statutory) profits projected over the entire future duration of existing liabilities.

Life & Savings New Business Value (NBV) is the value of the new business sold during the reporting period. The new business value includes both the initial cost (or strain) to sell new business and the future earnings and return of capital to the shareholder.

AXA Group EV is the sum of Life & Savings EEV and Shareholders’ Equity of other businesses.
AXA at a glance

- Concluding remarks, by Henri de Castries, CEO  Page 30
Today’s key messages

FY08 was the perfect storm with a severe impact upon the industry. **AXA was not immune but showed resilience**, with Euro 4 billion underlying earnings, a record combined ratio at 95.5%, Euro 8 billion of Life & Savings net inflows, and strong solvency and liquidity positions.

**Net Income** at Euro 0.9 billion was impacted by non economic mark-to-market accounting rules following the extreme widening of credit spreads, and would have otherwise reached Euro 2.8 billion.

**Necessary actions are taken to:**
- protect profitability in Life & Savings and Asset Management, with productivity efforts and lower VA hedging costs expected to offset a lower starting asset base
- maintain good momentum in Property & Casualty
- mitigate balance sheet risks
- avoid unwarranted shareholders’ dilution thanks to a Euro 6 billion Solvency I surplus and additional capital management flexibility if necessary

**We remain confident in the face of a challenging year 2009**
- Our confidence in the performance of AXA Group going forward is supported by the increasing engagement of our employees, the trust of our clients, the financial flexibility and diversification of the Group, and our operating profit resilience.
2008 was the perfect storm for the broad financial markets

**Worst stock market performance in 183 years**

- Equity volatility at a historical peak
  - Daily volatility over 20 days on the S&P 500

**Corporate spreads at record levels**

**Lowest interest rates over last 10 years**
In this adverse environment, AXA was not immune

**Impact on AXA**

- **Extreme equity market volatility levels**
  - Increased hedging costs of Variable Annuities with secondary guarantees

- **Fall in equity markets**
  - Lower fees from declining assets under management and lower level of unrealized capital gains in shareholders’ equity

- **Strong widening of credit spreads**
  - Net income impacted by accounting mark-to-market effects (mainly widening of credit spreads*)

---

* Whilst liabilities are not marked to market according to current IFRS set of rules
Yet AXA’s FY08 performance remained resilient

-17%

Change is on a comparable basis

Key drivers of change in Underlying Earnings

Life & Savings
- Higher cost of hedging Variable Annuity secondary guarantees, notably in the US

Property & Casualty
- Strong combined ratio overall (-1.9 pts) to 95.5%

Other
- Higher financing costs from acquisitions and USD depreciation impact
Underlying Earnings
Growth in continental Europe offset by the United States

Group Insurance Underlying Earnings*
by region
In Euro billion

- Strong increase in continental Europe boosted by Property & Casualty profits notably in France and Mediterranean & Latin American region
- Decrease in Asia (mainly Australia & New-Zealand) notably due to lower mutual funds under management, and in the United Kingdom
- Earnings from US Variable Annuity business impacted by sharp decline in equity markets and unprecedented volatility levels

* Excluding International insurance, Asset Management, Banking & Holdings
Adjusted Earnings, Net Income and Dividend

Adjusted earnings

Severe decline of equity markets was largely mitigated by our hedging program.

FY07 FY08

Adjusted earnings

3,699

6,138

Net income

Net income includes € 1.9 billion of negative IFRS accounting mark-to-market items which do not reflect AXA’s true economic performance.

FY07 FY08

1.20

0.40

* Based on Adjusted Earnings net of accrued interest charge on perpetual subordinated debts
2008 was also a year where AXA has further increased its reach

- **New clients & improved retention**
  - P&C: +1 million net new individual contracts
  - Life & Savings positive net new inflows (+ € 8.4bn)

- **Strengthened competencies**
  - Peter Kraus, CEO AllianceBernstein
  - Mike Bishop, Regional CEO Asia Life
  - Eric Chaney, Group Chief Economist

- **New talents**
  - More than 5,000 sales forces recruited in 2008
  - …and further investments in training, international mobility, talent management to attract and retain the best profiles across the company

- **New engagement**
  - Strong commitment worldwide to redefining standards
Increasing client and employee trust makes us confident in the future

- Focus on customer centricity beginning to be recognized
- Increasing share of operating investments dedicated to quality of service
- Employees’ positive attitude reflected in improved customer satisfaction level

(3) Mainly hedge funds and private equity
(4) Total invested assets referenced in page 53 of the financial supplement are Euro 560 billion including notably Euro 132 billion of Unit-Linked contracts, Euro 17 billion of With profits accounts, Euro 7 billion of Holding & other net of cash (mainly related to third party assets consolidated in IFRS), Euro 3.0 billion derivatives mark-to-market related to balance sheet hedges, Euro 3.1 billion Paris Re ring fenced assets, Euro 2.0 billion non looked-through Mutual funds (mainly fixed income), Euro 1.2 billion Morocco, Euro 1.3 billion other Asian entities and other timing differences for Euro 4 billion
(5) Including a Euro +2.1 billion mark-to-model adjustment to restate the impact from offer/demand imbalance, notably on US CMBS and CLOs (or Euro +0.9 billion net of tax and policyholders’ participation of which Euro +0.7 billion in OCI and Euro +0.2 billion in P&L)

Changes in asset allocation

- **Asset Backed Securities:**
  Lower values down from 89% at FY07 to 69%(5) at FY08

- **Cash:**
  Prudent liquidity management as well as increase in cash resulting from cash value of options used to hedge GMxB guarantees

- **Equities:**
  Reduced equity exposure from 9% to 4% mostly due to the drop in equity markets
Solvency
Capital management flexibility

Solvency I: 127%
(Solvency II: > 145%)

Underlying Earnings contribution
- Contribution in rebuilding solvency
  +18* pts p.a.

If required, additional capital management initiative
- Authorization to issue preferred shares if necessary. The resolution will be submitted to the Annual General Meeting to increase Group financial flexibility
- Preferred shares could be offered to AXA Mutual companies and/or shareholders and/or other institutional investors and/or to the public, up to an aggregate maximum issue amount of Euro 2 billion
- Estimated cost p.a.: 1.2 / 1.8 x Dividend, with a 10 to 14% cap and a 6 to 8% floor

Continuing our Ambition 2012 strategic initiatives:
“Becoming the preferred company”, combining quality of service investments and productivity initiatives.

* Breakdown according to 2008 Underlying Earnings & Revenues excluding Holdings with International business included in P&C and Banking included in Asset Management.
2009 business priorities
Preserving profitability in Life & Savings

Optimizing Variable Annuity businesses
- Continuing worldwide roll-out of VA products
- Reducing cost of hedging VA secondary guarantees

Addressing client needs
- Improving quality of service
- Adapting product range to the market environment (Euro 3 billion net inflows in banking operations in 2008 through short-term offers)

Adapting our cost structure, without inhibiting future growth
- Circa Euro 0.2 billion saving programs (UK, Japan, US)
- Continuing to invest in the business
2009 business priorities
Keeping momentum in Property & Casualty

Managing the cycle while maintaining high profitability levels

- In 2008, we combined revenue growth (+3%) with higher profitability (combined ratio down 1.9 points to 95.5%)
- In 2009, we expect:  
  + more favorable pricing trends & lower inflation risks
  + claim cost savings (Euro 0.2 billion in 2009), as part of Euro 0.7 billion 2012 objective
  + further delivery on Winterthur synergies (Euro 0.1 billion)
  - lower GDP & potential higher fraud

35 – AXA FY 08 Accounts – February 19, 2009
Today’s key messages

FY08 was the perfect storm with a severe impact upon the industry. AXA was not immune but showed resilience, with €4 billion underlying earnings, a record combined ratio at 95.5%, €8 billion of Life & Savings net inflows, and strong solvency and liquidity positions.

Net Income at €0.9 billion was impacted by non-economic mark-to-market accounting rules following the extreme widening of credit spreads, and would have otherwise reached €2.8 billion.

Necessary actions are taken to:

- protect profitability in Life & Savings and Asset Management, with productivity efforts and lower VA hedging costs expected to offset a lower starting asset base
- maintain good momentum in Property & Casualty
- mitigate balance sheet risks
- avoid unwarranted shareholders’ dilution thanks to a €6 billion Solvency I surplus and additional capital management flexibility if necessary

We remain confident in the face of a challenging year 2009

- Our confidence in the performance of AXA Group going forward is supported by the increasing engagement of our employees, the trust of our clients, the financial flexibility and diversification of the Group, and our operating profit resilience.
